

## Ford Based Midge for sale

Most of the work on this Midge was done by a Professional Vehicle Engineer. It is based on 1972 Ford Escort running gear with a welded double box section chassis and new suspension units. It has a rebuilt rear axle, good drive shaft and universals, clutch and gear box, new wheels, tyres, internal brake parts, master cylinder, pipes etc.

The 1400cc cross-flow has been completely rebuilt with everything new as required including the carburettor, distributor, Burton cam, exhaust system and radiator.

The body tub is skinned with aluminium and etch primed, with mudguards powder coated black. The dummy tank houses a new Capri petrol tank.

Also included is the original wiring harness, black carpet, and 'spoked chrome' plastic wheel trims. The Midge has been kept in an enclosed storage area with a dehumidifier.

The original build drawings and Kit Car magazines giving current test requirements are present although there is no paperwork for the chassis or registration number.

Offers around £1350 are invited. For more details please phone Roy Speake on 01323 724110 (Eastbourne) or email [roy.speake@yahoo.com](mailto:roy.speake@yahoo.com) A pair of Transit 'back' bench seats with seat belt attachments are available separately for £50.
